

ELISHA BAJEMON

AI & CYBERSECURITY ENGINEERING STUDENT

+33 7 69 50 00 66 | elishabajemon60@icloud.com | Paris, France | linkedin.com/in/elisha-bajemon | github.com/elishab60

PROFILE

Engineering student at **ECE Paris** (Cybersecurity major), currently interning at **TW3 Partners**, where I build AI systems for offensive security: fine-tuning open-source LLMs (LoRA, GRPO), LLM guardrails, and AI tooling for production pipelines. In parallel, I freelance on AI automation and full-stack projects. Seeking a **6-month end-of-studies internship (2027)** in **AI / ML and cybersecurity**. Active CTF player and hackathon winner.

TECHNICAL SKILLS

AI / ML: PyTorch, Hugging Face (Transformers, PEFT, TRL), LLM fine-tuning (LoRA, GRPO / RL), LLM guardrails & prompt-injection defense, agentic tooling & MCP servers, multi-LLM orchestration, n8n automation, Pandas, NumPy

Cybersecurity: Pentesting & intrusion automation, vulnerability analysis, secure development, cryptography, forensics

Languages: Python, C / C++, SQL, Java, JavaScript / TypeScript (React, Node.js), HTML5, CSS3

DevOps & Tools: Docker, AWS, Supabase / PostgreSQL, Git / GitHub, CI/CD, Linux, REST APIs

Spoken: French (native), English (C1), German (B2)

EXPERIENCE

Cybersecurity & AI Intern, TW3 Partners

Paris, France

AI for offensive security: LLM fine-tuning, agents & guardrails

Apr 2026 – Aug 2026

- **Fine-tuned open-source LLMs** (LoRA, GRPO / RL) for operational security tasks, adapting models to internal red-team workflows and cutting manual triage time.
- Built **LLM guardrails** with a **98.7%** prompt-injection block rate, securing a production application with **50,000 monthly users**.
- Shipped **DataGeo** to production: a GEO (Generative Engine Optimization) SaaS with a complete MCP server and a free, regex-based scoring algorithm, formalized in a research paper (in preparation).
- Automated intrusion-test scenarios in **Python**, orchestrating analyses and centralizing results into a reproducible pipeline.
- Containerized all tooling in **Docker**, cutting environment setup from hours to minutes for reproducible, portable runs.

CTO, Adswize (B2B AI SaaS)

Paris, France

AI SaaS for Meta Ads analytics, shipped to paying customers

Aug 2025 – Apr 2026

- Architected and shipped a **B2B AI SaaS** for Meta Ads analytics, with **multi-provider LLM orchestration** (OpenAI, Anthropic, Grok) using routing & fallback to generate contextual campaign recommendations.
- Owned the full stack and infrastructure end to end (React, Node.js, Supabase / PostgreSQL; self-hosted VPS with Docker & Coolify, CI/CD, monitoring), **leading a 4-person engineering team**.
- Integrated the **Meta Ads API** (OAuth, multi-account), secured the platform (JWT, RBAC, Supabase RLS), and reached **\$600 MRR** with paying customers.

AI Automation & Full-Stack Freelancer, Self-Employed

Paris / Remote

Custom automation & software for startups and SMBs

Jul 2025 – Present

- Built **n8n** workflows saving clients **20h/week** of manual work; integrated **8** external APIs and custom CRMs.
- Shipped custom AI automation and full-stack applications end to end, from spec to production deploy (clients under NDA).

Fullstack Developer Intern, ADDLAST (startup)

Paris, France

Jan 2025 – Feb 2025

- Built a full web app (React JS/TS, Node.js) with a secure REST API (JWT, SQLi/XSS protection); CI/CD on AWS with Docker.

EDUCATION

ECE Paris, MEng in Information Systems (Cybersecurity Major)

Paris, France

2023 – 2027

- Cryptography, pentesting, network security, forensics, vulnerability management.
- Secure programming (Python, C, SQL) and cybersecurity solution development; Linux, Docker, networks.

UTT, Preparatory Cycle for Engineering Studies

Troyes, France

2021 – 2023

- Engineering sciences, mathematics and computer science; algorithms and programming (C, Python); agile project management.

PROJECTS & INTERESTS

Awards: 1st place, Steamulo AI hackathon, Paris (15 teams).

Projects: Application-tracking SaaS (React, Node.js, Docker); CTF competitions and offensive-security labs on TryHackMe & HackTheBox.

Sport: Strength training (4 yrs), martial arts (MMA, 3 yrs).
